

# Ecosalt™

## Save 10% or more on your Rock Salt costs

Apply 30% less salt and save 10% on your material costs.

Ecosalt™ is a granular deicing product that features ice control performance superior to traditional highway salt, but is less corrosive and can reduce overall environmental damage from winter maintenance operations.

Ecosalt™ is treated with Fusion™ Liquid De-Icer, the most advanced 'beet juice' anti-icing and de-icing product with a proven track record established through years of use by winter maintenance professionals. The treatment process coats each Ecosalt™ granule with a layer of the highly effective Fusion base ingredient.

### Ecosalt™ is treated with Fusion™ to help you Save Money and Increase De-Icing and Anti-Icing Effectiveness

- Pre-treat your surfaces and de-ice accumulation with greater efficiency!
- Can be applied with 30% less salt than rock salt alone
- Liquid salt treatment can be brought to your site to treat your salt
- Can be bought bagged or in bulk
- Enhanced with the proven benefits of Fusion™ anti-icing / de-icing fluid
- Effective at temperatures where regular salt is not
- Increases efficiency through increased number of kilometers treated per load
- Reduces chlorides introduced into the environment
- Reduces corrosion to equipment
- Less corrosive than rock salt/ice melter

Fusion Liquid De-Icer can be brought right to your site to treat your salt pile to create Ecosalt™. We will supply, deliver and apply the liquid to your salt pile and provide blending instructions.

### Increases De-Icing/ Anti-Icing Efficiency:

- Is effective at temperatures where regular salt is not
- Can be applied with 30% less salt than rock salt alone
- Increases the number of kilometers treated per load

### Enhanced with the proven benefits of Fusion™ Ecosalt™:

- Ensures melting begins immediately upon application
- Enhances the brine process with a concentrated Fusion brine blend
- Significantly reduces the bounce and scatter of product by over 80%

### More Environmentally- Friendly Ecosalt™:

- Reduces the amount of chlorides introduced into the environment
- Has an organic coating that reduces corrosion to equipment
- Is less corrosive than rock salt/icemelter
