

**What it is:**

Naturally produced from plants, this **Horticultural Vinegar** contains 20% acetic acid and a plant-based surfactant.

Features/Benefits:

- Excellent for cleaning and de-scaling greenhouse and hydroponic equipment and drip-lines.
- Cleans up and brings back the new look to interlocking brick patios, driveways, stone landscaping.

Where to use it:

- Greenhouse, hothouse, solarium, garden shed, hydroponic garden.
- On interlocking driveways, patios, around pools, decorative stoneworks.

Rates:

- 1:1 mix with water is usually adequate for most jobs.
- Use it neat (100% full strength) for hard-to-clean or heavy-duty jobs.

Other:

- Use caution (rubber gloves, goggles) when handling full strength product.
- When cleaning interlocking bricks, be sure to wash off to prevent etching.
- Will not harm earthworms or beneficial bacteria and fungi.
- Will not persist and buildup harmful soil residues.
- Apply on calm days and in a manner to prevent spray-drift from coming in contact with and harming desirable vegetation.
